Adaptive Hybrid Retrieval-Augmented Generation

Optimizing the Computational Cost-Performance Trade-off via Learned Query Routing

Master's thesis presentation · KTH EECS, in collaboration with Ericsson
Dante Wesslund · [KTH email] · [programme code, track]
Supervisors: Arvid Eriksson (KTH), Peng Zhang (Ericsson) · Examiner: Pawel Herman

Layout: Title and Content

- First-level bullet (Calibri 28 pt)
- Each bullet should be a short phrase, not a sentence
- The thin blue rule and date/slide number sit in the footer

Layout: Section Header

Body text area of the Section Header layout

Layout: Two Content

- Body text area of the Two Content layout

Layout: Comparison

Body text area of the Comparison layout

Layout: Title Only

Layout: Content with Caption

- Body text area of the Content with Caption layout

Layout: Picture with Caption

Body text area of the Picture with Caption layout
